The Great City of Lahore and its Origin

The name of Lahore is associated with every Muslim dynasty of the North Asia right from the Ghazanavides to the Mughals. It was sometimes the seat of the government, some time the second capital, but it was always the place of importance. It was here, at Lahore, that Pakistan Resolution was passed on March 23, 1940 at Manto Park, now known as Iqbal Park, in the presence of millions of people who gathered there from all parts of India and Minar-i-Pakistan has been constructed right as the spot where Pakistan resolution was passed.

But Lahore is the city which claims attention not only of the students of history, archaeology and antiquities, but also of the general and even casual visitor as it offers many interesting places and faces. It is full of life and attracts millions of visitors of every class and creed ever year from all parts of Pakistan as well as abroad.

Around the end of the tenth century, the kingdom of Lahore was in the hands of a Brahman king, and in 988 A.D jai pal, the reigning monarch was decisively beaten by Sabuktigin (the father of ghaznavi). The first Muslim king to conquer Lahore was Mahmud of Ghana in 1021 A.D. He was followed by long line conquerors until the city passed into the hand of the mughal in 1524 A.D and rose to its greatest glory the centre of art, culture, trade and commerce during the next two hundred years of their domination.

Such has been the chequered history of this city but through the dust of confusion, barbarism, tyranny and the game of power it always sprang up glistening, glittering and smiling. It was perhaps these qualities of the city which induced scores of invaders to conquer it. The city now enjoy an central position as it is more or less right in the centre of the country and over well connected by road, rail and air with all the other major cities and towns of Pakistan .

Burj Khalifa

Burj Khalifa, known as **Burj Dubai** prior to its inauguration, is a Skyscraper in Dubai, United Arab Emirates, and is the tallest man made structure in the world, 2723 ft. Construction began on 21 September 2004. The building officially opened on 4 January 2010. The total cost for the project was about U\$1.5 billion.

Burj Khalifa was designed to be the centerpiece of a larger-scale, mixed-use development that would include 30000 homes, nine hotels, 3 hectares (7.4 acres) of parkland, at least 19 residential towers, the Dubai Mall, and the 12-hectare (30-acre) man-made Burj Khalifa Lake.

The building has returned the location of Earth's tallest freestanding structure to the Middle East.

The unique design and engineering challenges of building Burj Khalifa have been featured in a number of television documentaries, including the Big, Bigger, Biggest series on the National Geographic.

The opening of Burj Khalifa was held on 4 January 2010. The ceremony featured a display of 10000 fireworks, light beams projected on and around the tower, along with sound, light and water effects.

The building has been used by several experienced BASE jumpers for both authorized and unauthorized BASE jumping.

I like to invent

I would like to invent a flying car. It will save my time. That car will use water and air as fuel. It will be a great solution of global warming. I would save money for fuel (CNG and petrol). Then there would be no signals and long line of cars. It will be a great fun up in the sky moving in clouds and eating burgers. Its colour will be red.

Test your Definitions

Classroom:-

A place crowded with students resulting more outside than inside.

Exams:-

Something attempted, something done, but never wanted.

Failure:-

A word often used for students at the end of the exams, often used for those intelligent students, who have better things to do than study.

Grammar:-

One fool makes the rules and the other fools try to follow them, or destroy them.

Library:-

A place where one can gossip peacefully.

Students:-

A football which is kicked from the parents to the teacher for a future goal.

Doing a Bunk:-

A vanishing act often thought by students, to get freedom from the tyranny of studies but often caught in the thoughts.

Knowledge:-

A commodity rarely found in students, but amply stored in libraries.

Bags:-

Place where one can hide one's personal belongings.

Hall:-

A place where one can relax without any interruption.

Craziest Useful Gadgets

Technology is the practical application of knowledge, it enriches our lives. Although the latest technology benefits us by performing tasks quickly and efficiently, at the same time, such gadgets result in shunning the rest of the world. Here are some of the gadgets. They are new forms of old ones. These are convenient, durable, portable and stylish.

BENDI KEYBOARD:

It is flexible, practical and easier for you to see what you are typing during those dimly lit evenings. It is also washable.

USB HOT AND COLD COASTER:

It lets you keep your favorite beverage hot or cold - just the way you like it. It's completely USB-powered, so you'll need to plug it into a free USB port on your computer. It's said to heat up to 104 degrees and chill down to 59 degrees.

USB NECKLACES AND SUNGLASSES:

We can find USB in an elegant and beautiful form i.e necklaces and cool sunglasses. They help to carry USB easily, look stylish and prevent USB loss.

E-BOOK READER:

With its help we can read novels while traveling. Electronic books can be downloaded in it. It has 5 inches screen. You can carry it anywhere easily you want.

COLOUR PICKING PEN;

It will hypothetically come with a sensor as well as RGB ink tanks, capable of creating virtually any color you see in the natural world and putting it down to paper.

TALKING MOUSE:

It is compatible with Microsoft Windows Vista and Windows XP. Its rotating wheel can be used as volume controller.

NAPKIN PC:

It is a device that uses e-paper and radio frequency (RF) technology to enable creative groups to collaborate more effectively.

Geographic Information System (GIS)

A geographic information system is a system designed to capture, store, manipulate, analyze, manage and present all types of geographical data. GIS is sometimes used for geographical information studies to refer to the academic discipline or career of working with geographic information system.

A GIS helps you to answer questions and solve problems by looking at your data in a way that is quickly understood and easily shared.

Modern GIS technologies use digital information, for which various digitized data creation methods are used. Most of the traditional mathematical capabilities, plus an extensive set of advance map processing operations are available in modern GIS. You can add, subtract, multiply, divide, root, log, cosine differentiate and even integrate maps. After all maps in GIS are just organized sets of numbers.

In many ways, GIS is “as different as it is similar” to traditional mapping. Its early expressions simply automated existing capacities but in its modern form it challenges the very nature and utility of maps.

Rose

The rose is rightly called “the queen of flower”. It is beautiful to look at. It is very sweet to smell. It is of many kinds and colours. It is used for making garlands and bouquets. It is to be plucked with great care, for its plants are very thorny. Rose-water and gulkand are used as medicines in the East. The Otto of the rose is said to be invented by Queen Nur Jahan. Its plants are nearly four feet high.

Advantages & Disadvantages of Internet

Today we know that science has revolutionized our life through equipments and technology. like Television, Radio, Electricity, but the most wonderful invention of the 20th century is computer. The use of Internet has made means of communication fast and safe. It is the fastest way of modern communication which has made the affairs of business easy and reliable. There are numerous websites like OLX does online business. There is also a way to do online booking through internet. Internet (E-mail Electronic-mail) is a means to send your messages to your friends. It facilitates us with great information and knowledge about various aspects of society. There are also disadvantages of Internet that our young students waste their time in watching time - wasting programmes. It is harmful for our eye-sight. It is also a very expensive way of communication that a large number of people cannot afford service packages. But beside all these facts, Internet is a contribution to mankind and we can use it for our benefits. As a whole it creates atmosphere of happiness because we can communicate to our relatives, living away from us. But we should be careful not to misuse the Internet.

A Horrible Dream

One night I was coming back to my home from my Aunt's home on my bike and the bike head light was fused. My bike was running like a leopard at full speed. Suddenly, I saw a truck leading towards me. When I took notice that the truck driver was sleeping on the steering, it made me wet with cold sweat. I tried to apply brakes but it was too late and I hit badly with the bonnet of the truck. I flew like a crow from my bike and then I realized that I was having a horrible dream because my shrieks had filled my bed room with my whole family.

True Friends

Friendship is something that takes time to happen. You may think having a friend means, you share a friendship but I do not think so. Friendship to me is to know someone so well that you can tell someone what a person feels. A friend is a person who is always by your side when times are bad. When you feel like no one cares for you, it is not true only a true friend does and will know when you are feeling this and will do everything in his power to make you feel better. A true friend is a person who understands what you are saying even if it does not make any sense.

I have a few true friends in my life who have helped me to change my life completely. Not a single day passes by when I do not talk to them. My friends are an important part of my life and if I get into a fight with one of them. We make up in a minute because we cannot be mad at each other since we know how much the other one cares for us. Friends are important in my life because when I feel down they are the only ones I feel like talking with. All of my friends are of different ages, some of them are 14 or 15 years old & they are my role models. Whenever I see them I learn new and different things from them. All of my friends have different meanings to me because they all have special traits in them that make them my friend. Some are smart, some are funny, they all are my friends because they trust me.

16 Unusual Facts about the human body

1. Tongue Print:

Don't stick out your tongue if you want to hide your identity. Similar to fingerprints, everyone also has a unique tongue print!

2. Bone Count:

An Adult has fewer bones than a baby. We start life with 350 bones, but because bones fuse together during growth, we end up with only 206 as adults.

3. New Stomach:

Did you know that you get a new stomach lining every three to four days? If you didn't, the strong acids your stomach uses to digest food would also digest your stomach.

4. Scent Remembering:

Your nose is not as sensitive as a dog's, but it can remember 50,000 different scents.

5. Large Intestine:

The small intestine is about four times as long as the length of the large intestine. If they weren't looped back and forth upon itself, its length of 18 to 23 feet wouldn't fit into the abdominal cavity, making things rather messy.

6. Bacteria:

This will really make your skin crawl, every square inch of skin on the human body has about 32 million bacteria on it, but fortunately, the vast majority of them are harmless.

7. Source of Body Odour:

The source of smelly feet, like smelly armpits, is sweat. And people sweat buckets from their feet. Pair of feet have 500,000 sweat glands and can produce more than a pint of sweat a day.

8. Sneeze Speed:

The air from a human sneeze can travel at speeds of 100 miles per hour or more, another good reason to cover your nose and mouth when sneeze or duck when you hear one coming

9. Blood Distance:

Blood has a long road to travel. Laid end to end, there are about 60000 miles of blood vessels in the human body. And the hard working heart pumps about 2,000 gallons of blood through those vessels every day.

10. Saliva Quantity:

You may not want to swim in your spit, but if you saved it all up, you could in a lifetime; the average person produces about 25,000 quats of Saliva enough to fill two swimming pools.

11. Snore Loudness:

By 60 years of age, 60% of men and 40% women snore. But the sound of a snore can seem deafening. While snore average around 60 decibels, the noise level of normal speech, they can reach more than 80 decibels, Eighty decibels is a loud as the sound of a nomadic drill breaking up concrete. Noise

levels over 85 decibels are considered hazardous to the human ear.

12. Hair Colour and Count:

Hair colour helps determine how dense the hair on your head is, and blonds (only natural ones, of course), top the list. The average human head has 1,00,000 hair follicles, each of which is capable of producing 20 individual hairs during a person's lifetimes. Blondes average 1,46,000 follicles. People with black hair tend to have about 1,10,000 follicles, while those with brown hair are right on target with 1,00,000

follicles. Redheads have the least dense hair, averaging about 86,000 follicles.

13. Shedding:

Your net isn't the only in the house with a shedding problem.

Humans shed about 6,00,000 particles of skin every hour. That works out to about 1.5 pounds each year, so the average person will lose around 105 pounds of skin by age 70.

14. Nail growth:

If you are clipping your fingernails more often than your toenails, that's only natural the nails that get the most exposure and are used most frequently grow the fastest.

Finger nails grow fastest on the hand that you write in the longest fingers. On average, nails grow about one tenth

15. Head weight:

No wonder bodies have such a hard time holding up their heads. The human head is one quarter to our total length at birth but only one eighth of our total length by the time we reach adulthood.

16. Need for sleep:

If you say that you're dying to get good nights sleep, you could mean that literally you can go without eating for weeks but not without sleep. After eleven days, you'll be asleep, forever.

The Space Adventure

When I was a little baby I used to recite the poem:

“Twinkle twinkle little star,
How I wonder what you are,
Up above the world so high,
Like a diamond in the sky”

This diamond, like stars really attracts me and I really want to touch them. I have always been busy to think that there must be some fairies living on the stars. As I grew up, I realize that stars are not the house of fairies, but stars and space are the mysteries in our universe, so now I long to go to space. One day I saw an advertisement in the newspaper from SPARCO that they were arranging a trip to space for the students of less then 12 years. I felt very excited and ran to my father and requested him to go with me to SPARCO office for registration.

The SPARCO staff told us that we had to do some exercises for the preparation. They taught me how to hold my breath. During this practice, I was badly shaken and after one week I was ready to go to space with the crew of SPARCO and that was the day when my dream was going to become true. I was very excited and the countdown started _____5, 6, 4, 3,2,1,0 and rocket launched. It took 3 hours to reach the space.

The space was very vast, mysterious and silent. It was very dark all around. I saw the twinkling stars, the big moon and the planets. I saw asteroid from very near.

I spent two hours there and came back. I did not touch the stars and the moon but when I went to space I felt that I was really touching them. That day was the most memorable day of my life.

Khewra Salt Mines

Khewra salt mine is located in Khewra, Jhelum District and 260 kilometers from Lahore. It is the second largest salt mine in the world, situated in the foot hills of the salt range, the Khewra salt mines are the oldest in South Asia.

Salt has been mined at Khewra since 320Bc in under ground area of about 110 square kilometers. The main tunnel at ground level was developed by Dr. Warth 1872 but since then it has been converted into tourist resort. Khewra salt mine has estimated total of 220 million tons of rock salt deposits. The current production from the mine is 465000 tons salt per annum.

At places rock salt is 99%. Pure salt is transparent, white, pink, and reddish to beef-colour red and white colour salt.

Discovery of Mine:

It is said that Alexander visited South Asia, coming across Jhelum and Mianwali region, Khewra salt mine was discovered. The discovery of the mines, however was not made by Alexander nor his "allies", but by his horse. It is stated when Alexander's Army stopped here for rest, the horses started licking the stones. One of his soldiers took notice of it and when he tasted the rock stone, it was salty thus leading to the discovery of the mines.

Afterwards these mines were wholly purchased by a local Raja, from that era to independence of Pakistan, these mines remained the property of locally living Janjua Rajas, the son of Raja Mal.

In March 1849, the British captured the salt mines and resistance movement began against the poor conditions and prices imposed upon the miners.

From 1849- 62 they were on strike which were heavily suppressed and in 1872, new method of measurement and pricing was introduced which increased workload. Mines were locked so miners could not leave without fulfilling their quotas. Men, women and children were even born in mines due to the conditions imposed.

Further strikes were carried out by the workers from 1872 -76. This time, the chief mine engineer Dr. Warth approached Delhi Head office and asked H.Wright to send British soldiers. Twelve of the worker's representative shot at the front of the mines. Their graves are outside, at the middle gates of mines.

Know Thyself

Socrates said about 600 or so years before “know thyself” The most important in life to know yourself. It is a creative act, through this you can accomplish countless things and explore the best in yourself. It is the starting point of personal and spiritual growth. Think carefully! Do you really want to know about yourself and why? Of course yes! Because self discovery is your search for your own truth and inner peace. The power of knowing our thoughts, feelings and actions opens the way for balancing, harmonizing and healing the totality of our being. Knowledge of self is also considered as the first step in our pursuit of happiness for unless we know what we are, we cannot know what will bring about our fulfillment and without fulfillment of our true nature we cannot be happy.

“What do you seek, O pilgrim on the path
Liberation from pain and freedom from all the sufferings.
The answer to thy question is already in thy heart.
Listen, O pilgrim, to the whispering of thy soul
Know thy self..... For in thyself is found
All these are to be known.”

Memories

Memories cause pain or contentment. They may exasperate and appease, our emotions irritate and gratify us. I still remember those good old days when I was a kid. I used to run outside whenever it rained. I still feel my loud screams consoling the weeping sky. I remember the panorama when the trees sung with the wind and the rain drops played the background music. I cherish those moments of my childhood when I used to play with my friends all day long, and those long summer slumbers come back to me like the sweetness of its sweetest fruits ---The charms of childhood , I used to live in a world of my own, a world free from all sorts of worries and sorrows . Now all those glorious moments, which are still fresh in my memories, seem like a fairy tale of the long gone past. Now the rain falls only to bring water, the trees sing, only to shed leaves and the leaves fall only to be treaded upon. Now when the rain comes, it is not the same; the urge to go out and get myself drenched never arises. I just sit by my window in a melancholic mood cherishing the memories of childhood, which bring a smile to my face. These memories are the only link between my childhood and me. With this memory in my mind I can feel my childhood in the falling rains, in the singing birds and in the dancing trees. Memories are the most precious treasure one can ever possess. It's a treasure that can never be stolen.

I thank God for giving me such a precious gift my memories

How to Achieve Success in Life

❖ **Goals**

- First of all set your goals in life
- Goals must be achievable and must have a time frame.
- Define ways to achieve them.

❖ **Healthy Body**

- To have a healthy body is one of the most important requisites in the path of achieving success.
- Eat balance diet to attain a balanced body.
- Take breakfast regularly.
- Drink 8-10 glasses of water daily.
- Keep water bottle with you in school hours to fulfill your body water requirements from morning to moon as water keeps you hydrated and fresh.
- Take proper home made lunch during break. Avoid junk food to avoid illness.
- Take regular exercises.
- Play such games which require large muscle movements.
- Take bath regularly as it lessens your body temperature and keeps you cool and fresh the whole day.
- Take proper sleep for 6- 8 hours daily in night and wake early in the morning.
- Be happy and share your problems with parents.

❖ **Sharp Mind**

- Sharp mind is the utmost desire to achieve success.
- Practice reading story books or other books on scientific knowledge (to improve your imaginative power, creativity skills, vocabulary) weekly.
- Be regular in class, listen the lecture carefully and jot down important points from lecture.
- Solve your queries related to studies by asking questions to the teacher in class.
- Reread your text whenever have extra time in school.
- Sit in front rows in the class (try to sit at some distance from close friends as they may divert your attention from the lecture to themselves i-e like sharing things during lecture etc.)
- Study at home for 2- 4 hours daily.
- Do not forget to enjoy break time with friends.
- Watch scientific, educational programs on television and share your knowledge with your parents.
- Say prayer at regular times.

These are some key points which will surely help you to attain success.

Best of Luck! 😊

Kiran Islam Ex- Student
G.W.Township Campus
